«Are we not able to  
repeat it ?!»

Appendix NO.1

«If our messages to you were carried by words, we would not have carried them to you by planes»

## Introduction

In the name of Allah, the Most Gracious, the Most Merciful.

Oh Allah, grant us success, bless us, grant us conquest, help us and make us helpful.

Oh Allah, it is for Thee to deal with the Crusaders.

Oh Allah, kill them harshly.

Oh Allah, do not spare any of them, and make of them an example to nations and people.

---

These days we are coming close to **the 20th anniversary of the blessed raid of Manhattan**, and on this occasion, we would like to present to you a simple appendix in which we discuss some points related to jihadi operations by means of civil aircrafts.

## Opening:

» **First of all:** the idea of using civil aircraft as a weapon of war and mass destruction did not exist in practice before September 11, 2001, as this was the first Operation of this kind since aircraft were invented (to know the history of the Manhattan attack, watch the documentary “**Moseirat Al Wars**”), the operation of Manhattan is the biggest blow that the cross has received in several centuries, and despite the enormity of the invasion and the severity of carrying it out, **its implementation again is not impossible**, and is not limited to the Jihadist groups, but is an open door even to lone wolves, **and here we will go over a few aspects:**

## • **The carrying out of such operations is not limited to Jihadist Groups:**

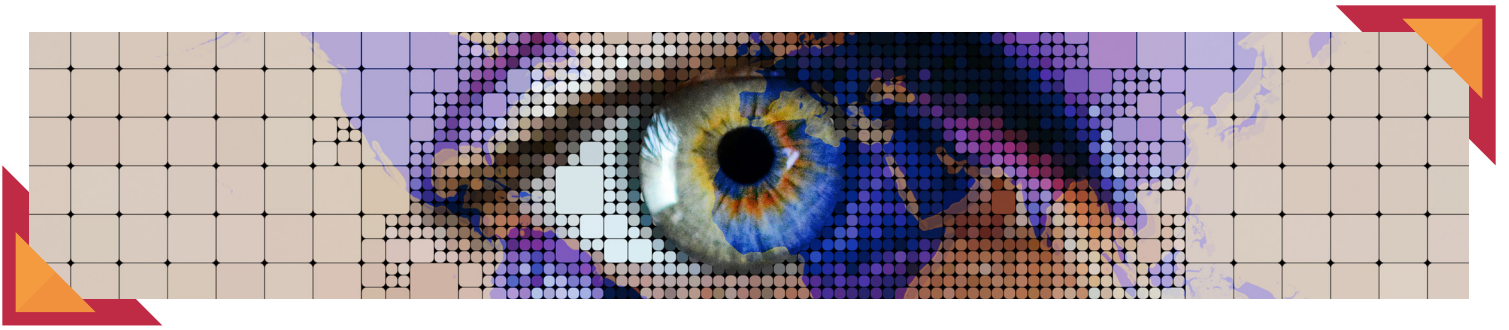

Some of our brothers would think that achieving such an operation is exclusive to the Jihadist groups with power and influence, although that is incorrect, perhaps a simple group consisting of two or more Jihadists are able by the power of Allah is capable of humiliating the infidels with a similar operation, brothers should prepare themselves for years ahead of attempting such forays, and the first stem to achieving that is to study aviation, whereas the aviation specialty has become available in many universities around the Arab World, and here we see a golden opportunity for students who study in high school to major in aviation for the future even if a brother is not equipped to do such an operation, but prepare yourself for the future and ask for aspire for the reward of Ajr from Allah, where Allah would change things up, and while a brother is studying aviation he should prepare himself in other aspects needed for the operation, such as seeking knowledge, working on physical fitness and persevering on learning martial arts and hand to hand combat, and one of the most important things to follow is a brother must pick a group of brothers that are of the upmost trustworthy even to an extent of creating a group of your relatives and people you have grown up with, and we urge the siblings to do as the two **Rabea brothers and Bilal Al Hazimi** from the foray of Manhattan.

## • **Civil aircraft operations do not need explosives or weapons:**

The heroes of the foray of Manhattan did not use any explosives or firearms for their attack, but rather relied on just simple sharp equipment in addition to their reliance -after trusting in God- on physical fitness and methods of self-defense, and that here solves the biggest problem that the wolves of Islam suffer from, which is the obtaining of explosive materials, and entering them into public places and government headquarters, and even if the wolf manages to obtain and smuggle the explosives into enemy headquarters, the Damage won't be a tenth of what a guided aircraft does as a weapon.

- **it is not required to carry out such operations in America only:**

It is not necessary that such operations take place in the American soil only, **the enemies of Islam are spread all over the world**, so whoever is in France should carry out targets in **France**, and whoever is in **Britain**, should do the same, and whoever was in **Andalusia**, the should target the occupying infidels, and this applies to everywhere, so here is **Russia And China, Sweden, Italy** and other Crusaders.

---

- **A special call to the off-spring of the hero, Marwan Al-Shehhi:**

---

Throughout this simple appendix we'd like to send a special invitation to the off-spring of the Hero Marwan Al-Shehhi may Allah accept him among the martyrs in **UAE**, we call to you, that oh heroes of Islam, today is your day and Islam is your one true religion so show Allah your competence and use the cunning of your enemies in what they call the Normalization with occupying Zionists of Israel against them, **take advantage of the planes that are taking off from Al-Zayed Airports to Tel Aviv walk in the footsteps of your hero Marwan and achieve what all Muslims dream that is to see a day like the blessed Tuesday happen in Tel Aviv, where Jews are crushed.**

---

and we also call to the all the Muslim people in all countries that has normalized relationships with Zionists to do the same.

---

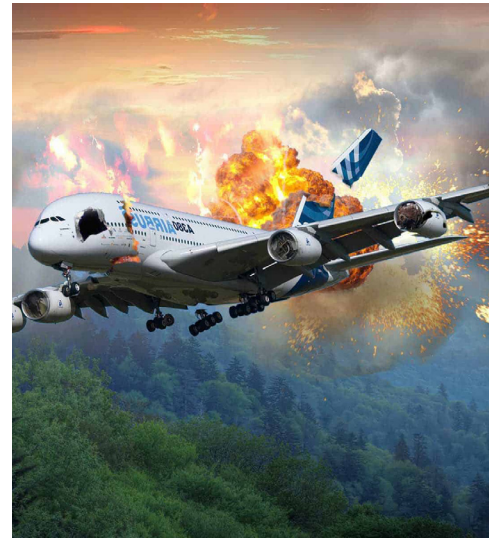

- **Youth of Islam, Do not undermine yourself:**

You might think that this speech is out of your reach and that you have no power and that this speech is directed to others, on the contrary, by the name of Allah it is directed to you on the specific yes you,, you are not an easy prey, you are the off-spring of the ones who ended caesarean empire, and if you had the true intentions and have put Allah by your side and in front of your eyes and you made use of the available means,

then be confident that Allah will ease the means and ways to you to carry out your intentions in achieving such operations, **think for a moment what have the heroes of Manhattan over you?. why not write your name along side theirs and win a special place in heaven?.** all we have mentioned in this appendix is but headlines and a few aspects so we can put you in the bigger picture and inform you that **such forays are not impossible** and we leave the rest of planning and preparations to you, lions of Islam.

- Aircraft operations are not limited to the orientation of the aircraft as a weapon, but have several ways to recount them:

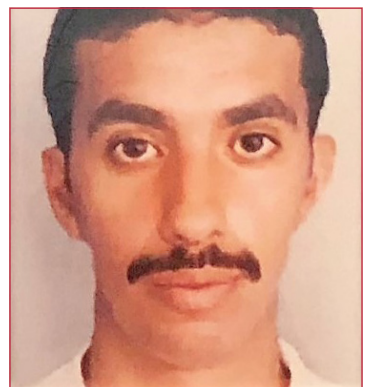

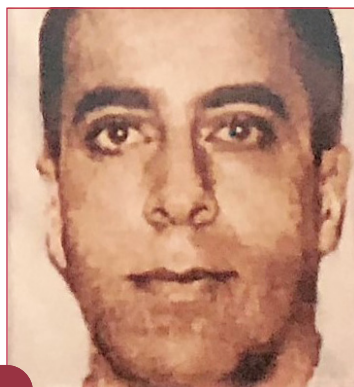

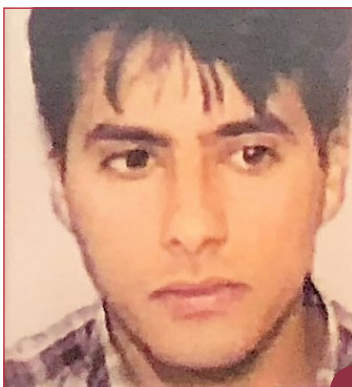

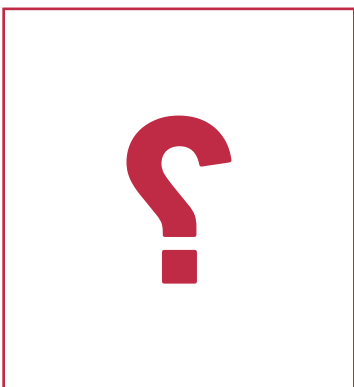

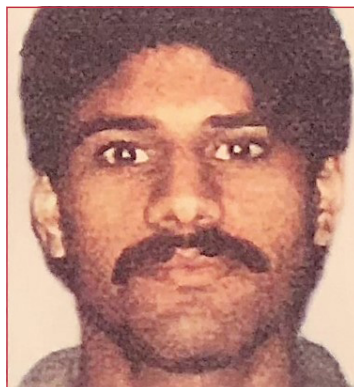

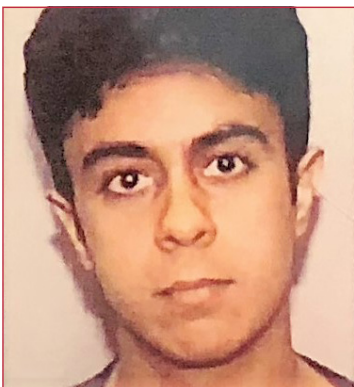

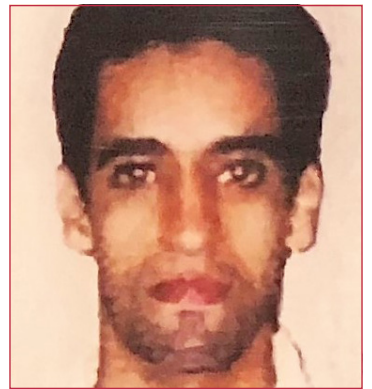

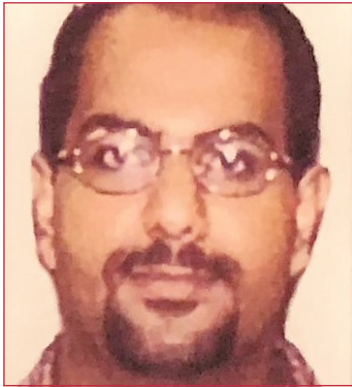

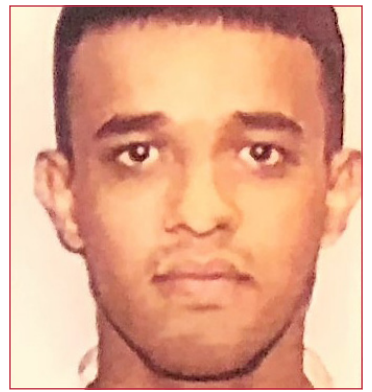

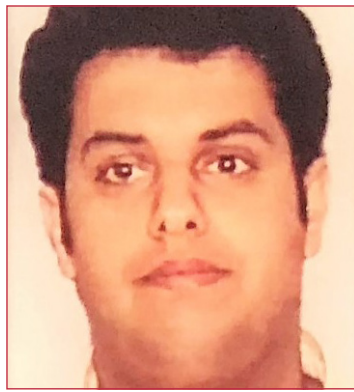

3) The operation of brother **Omar Farouk**, who tried to shoot down an American plane by **booby-trapping his underwear** in 2010, but God willing the operation failed.

2) The operation of Brother **Richard** (several months after the foray of Mathattan), who sought to bring down a plane headed from Paris to America by **booby-trapping his shoes**, but God willing, the operation failed.

1) **The parcel bomb** operation that brought down an American airliner in 2009.

I swear by the name of Allah the greatest  
that has created the pillarless sky that  
America will not live in peace as long  
as we we dont live it in palestine, not  
before all the infidel armies are cast  
out from the land of mohammad peace  
be upon him.
